Amendments to the Specification:

On page 27, please replace the paragraph beginning on line 9 with the

following amended paragraph:

At level [[3]] 4, the area 101 is managed with a plurality of blocks [[102]]

104, i.e., $2 \times 2 = 4$ blocks. Each block 104 is divided into a plurality of meshes

105 and is managed with the meshes. In the embodiment, the data in the block

are managed as p x q sets of mesh data. The blocks 104 of map data at the same

level are each divided into p x q meshes.
